

Introducing
Vmath Level C
Available
Fall 2009

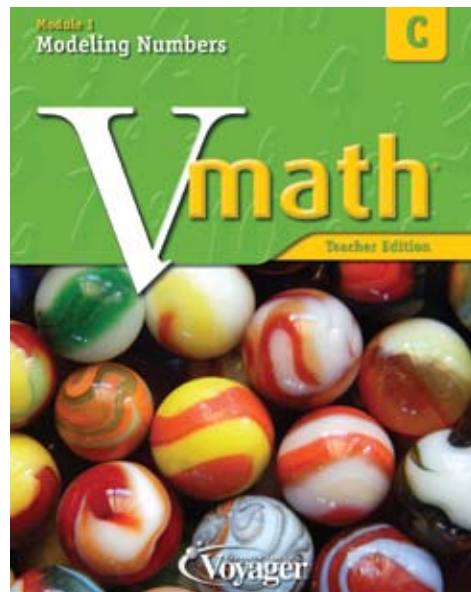

Why wait until they struggle in math?

Intervene early before learning gaps emerge!

Now, with Vmath® Level C, second-graders can build a solid math foundation using the Vmath blended approach of teacher-led instruction and student centered technology.

The systematic, scaffolded classroom instruction is reinforced in VmathLive® where students practice math skills and strategies, prepare for high-stakes tests, and play in real-time competitions of speed and skill with other students around the world. The built-in assessment system allows instructors to measure student progress and adjust instruction when necessary.

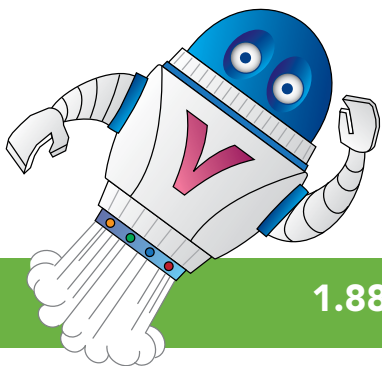

LEVEL C Modules

1. Modeling Numbers
2. Addition
3. Subtraction
4. Measurement
5. Time and Money
6. Geometry
7. Graphing and Probability
8. Fraction and Concepts of Multiplying and Dividing

In Vmath Level C, students:

- Connect math lessons to the real world
- Learn and understand the language of math
- Discuss math with peers and teachers
- Play games and engage in math centers that reinforce learning
- Build motivation and excitement with VmathLive

Make all students math achievers with Vmath.

- Differentiate instruction and address different learning modalities
- Teach proven research-based math instruction
- Provide targeted, corrective feedback through error analysis tools
- Identify student strengths and weaknesses and monitor progress toward goals

Pictured Above: Vmath is a proven math intervention program for students in grades 2–8.

Extend the school day and increase time on task with 24/7 access.

VmathLive® is the fun and motivating online technology component where students practice math skills, strategies, and concepts, prepare for high-stakes tests, and play in real-time competitions of speed and skill with other students around the world!

- Game-like environment that engages and motivates
- Focus on fundamental math skills and concepts
- Reinforces lessons taught in the Vmath classroom
- Built-in error analysis with animated demonstrations
- Real-time competitions of speed and skill
- Aligns to state standards
